SOFTWARE ENGINEERING & AI DEVELOPMENT

Motivated and results-driven Computer Science student with strong hands-on experience in building full-stack and AI-powered applications. Skilled in React Native, backend systems, and deploying machine learning solutions into real-world use cases. Passionate about solving practical problems using scalable and efficient systems.

SKILLS

Languages: Python, JavaScript, Java	Databases: PostgreSQL (Supabase),	AI/ML: TensorFlow Lite, Machine
Frameworks: React Native, React.js,	MongoDB, MySQL	Learning, NLP
Node.js, Express.js	Tools: Git, Postman, VS Code	AI Tools: Antigravity, N8N,
		Emergent

PROJECT EXPERIENCE

FarmAssist (Kisan App) · [GitHub Link](#)

Developed a full-stack agricultural mobile app using React Native and Node.js with offline AI-based crop disease detection using TensorFlow Lite. Automated ingestion of 1500+ daily market prices via APIs and built a statistical price prediction system. Also implemented inventory tracking and crop residue management features to support farmers.

HealthHack – AI Healthcare Assistant [GitHub Link](#)

Built a cross-platform mobile app using React Native with a Django backend for real-time health analysis using machine learning models. Implemented secure authentication and health tracking with Supabase, along with a responsive and user-friendly interface.

FraudSentry AI [GitHub Link](#)

Developed a real-time fraud detection system using FastAPI and MongoDB with machine learning models leveraging multiple engineered features. Built REST APIs for prediction and implemented alerting, monitoring, and basic explainability features.

HridyaVayu – AI Asthma Care System

Developed an AI-powered healthcare system using React and Flask to monitor asthma risk based on real-time environmental data and user inputs. Integrated APIs to fetch air quality metrics and combined them with user health profiles to generate risk scores and alerts.

EDUCATION & CERTIFICATIONS

B.Tech – Computer Science and Engineering

VIT Bhopal University (2023 – 2027)

CGPA: 8.29

AWS Cloud Practitioner Practice Set (CLF-C02)

AWS Solution Architect

MERN Full Stack Certification Training – Six Phrase

ACHIEVEMENTS & ACTIVITIES

Completed Ninja Slayground 2.0 (Level 3) coding challenge

Open Source Contributor – GSSoC Extd 2024

Hacktoberfest 2024 – 4 PRs merged

60+ days coding streak on LeetCode

240+ days streak on duolingo learning Japanese.
