

SAGAR PORWAL

Aspiring AI Engineer

+91-9829448835 | porwalsagar1@gmail.com | linkedin.com/in/sagarporwal | github.com/Sagarporwa1

EDUCATION

VIT Bhopal University — B.Tech, Computer Science and Engineering	2023 – 2027
CGPA: 8.15 Bhopal, Madhya Pradesh	
LASEA Jhalawar — XII (CBSE), 76.8% Roop Nagar Public School — X (CBSE), 92.5%	2020 – 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, Java

Frameworks: React Native, React.js, Node.js, Express.js, Flask, FastAPI, Django

Databases: PostgreSQL (Supabase), MongoDB, MySQL

Tools: Git, Postman, VS Code, Antigravity, N8N, Emergent

Core CS: Data Structures & Algorithms, OOPS, DBMS, Operating Systems

Soft Skills: Teamwork & Collaboration, Communication, Problem-Solving

EXPERIENCE

Advanced Software Engineering & Development Intern — MPOnline Skilling Initiative Jun – Jul 2026

- Completed an intensive, live-batch training program under a government-backed skilling initiative (Program Code SE3), covering the full software development lifecycle from requirements and design through implementation and testing.
- Built hands-on proficiency in industry-standard development workflows, including version control practices, structured debugging, and collaborative coding conventions used in professional engineering teams.

PROJECTS

CyberShield AI | FastAPI, MongoDB, Machine Learning | [GitHub](#)

- Engineered a real-time fraud detection system by training machine learning models on multiple engineered transaction features (frequency, amount deviation, and behavioral patterns) to flag anomalous activity.
- Designed and deployed REST APIs with FastAPI to power live prediction, alerting, and monitoring, using MongoDB to persist transaction records, model outputs, and alert history.
- Surfaced basic model explainability alongside predictions so end users could see which features drove a given fraud flag.

Agentic AI PDF Chatbot & Search Agent | LangGraph, LangChain, Next.js, Supabase | [GitHub](#)

- Architected a full-stack agentic RAG application that lets users upload PDFs, index their contents, and hold a conversation grounded in that document set, orchestrating ingestion, chunking, and retrieval end to end with LangGraph and LangChain.
- Implemented semantic vector search with Supabase pgvector to retrieve the most relevant document chunks for each query, grounding responses in the source material.
- Delivered real-time streamed answers with inline source citations via Server-Sent Events, built on a Next.js front end within a Turborepo-managed monorepo.

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Practice Question Set (CLF-C02), AWS Training & Certification — Sep 2025
- AWS Technical Essentials, AWS Training & Certification — Sep 2025
- ServiceNow Virtual Internship – Agentic AI & CSA Fundamentals, AICTE–SmartBridge — May 2026
- MERN Full Stack Certification Training, Six Phrase

ACHIEVEMENTS & ACTIVITIES

- Participated in a national-level hackathon on two occasions, advancing to the second round both times, where only 1 in 3 teams were selected from a pool of 700+ participating teams.
- Achieved Level 3 Conqueror in Ninja Slayground 2.0, a 21-day competitive coding challenge by Coding Ninjas.
- Contributed to open-source projects through GSSoC Extd 2024 and merged 4 pull requests during Hacktoberfest 2024.
- Sustained a 60+ day coding streak on LeetCode and a 340+ day Japanese-language learning streak on Duolingo.
- Gained exposure to startup incubation, R&D, and telecom infrastructure through visits to T-Hub, T-Works, BSNL, and CDAC.
- Completed a Networks Workshop conducted by Cisco, Pune.
